Overview

SafetyCast™ Hazard Illumination Forklift Spot Light provides visual warning to pedestrians and vehicles in accident prone areas, or areas where pedestrians share floor space with mobile industrial handling equipment, such as warehouses, dock and loading areas or any industrial workplace pedestrians. This solution is extremely effective in noisy areas where audible alarms can be drowned out, or where multiple alarms may confuse the pedestrian. The product is weatherproof, thus ideal for indoor and outdoor use.

Key Features

- Easy to install on any forklift in minutes
- Adjustable mounting bracket allows for easy positioning of the beam on the floor
- High visibility illuminated projections provide the pedestrian with clear knowledge of their proximity to moving equipment
- Weatherproof and ideal for indoor/outdoor use
- Run off 10-80VDC

Specifications

Lamp Details

| | |
|---------------------|-------------------|
| Amp Draw: | 0.8A@12V,0.4A@24V |
| Rated Power: | 10W |
| Voltage Max: | 80V |

Optical

| | |
|-------------------------|-----------|
| Light Colour: | Red, Blue |
| Projection Type: | Spot |

| | |
|--------------------------------|--|
| Temperature Range (°C): | -45~80°C |
| Operating Voltage: | 10-80V DC |
| IP Rating: | IP67 Compliant - Dust/Water Ingress |
| Weight: | 825g |
| Material: | UV Resistant Powder Coat, High-Grade Aluminum Alloy, Impact Resistant Polycarbonate Lens |
